### Highest Rated Coffees

We found 884 coffees and espressos that earned an outstanding score of 94 points or higher. The reviews below appear in reverse chronological order by review date. Older reviews may no longer accurately reflect current versions of the same coffee.

**98** **Dragonfly Coffee Roasters**  
Elida Estate Geisha Green-Tip Natural

**Review Date:** Oct 2019  
**Price:** \$100.00/21 grams; limited availability

Vast yet intimate in its layered intricacy: complete and perfectly balanced. Complex flowers (citrus blossom, ginger blossom, aromatic orchid), bright, fresh fruit (pear, peach, tangerine), sweet cocoa, sandalwood, a hint of candycap mushroom in aroma and cup. In structure, juicy and lyrically bright with a subtly pungent umami base; light-footed, satiny mouthfeel. Pear leads into long, vibrantly flavor-saturated finish.

**95** **Green Stone Coffee**  
Washed Kenya

**Review Date:** Oct 2019  
**Price:** NT \$550/225 grams

**Blind Assessment:** Vast yet intimate in its layered intricacy: complete and perfectly balanced. Complex flowers (citrus blossom, ginger blossom, aromatic orchid), bright, fresh fruit (pear, peach, tangerine), sweet cocoa, sandalwood, a hint of candycap mushroom in aroma and cup. In structure, juicy and lyrically bright with a subtly pungent umami base; light-footed, satiny mouthfeel. Pear leads into long, vibrantly flavor-saturated finish.

# CoffeeReview at a glance

# Coffee Characteristics

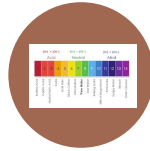

## Aroma

*fragrance produced by hot, freshly brewed coffee*

## Acidity

*the pleasant tartness of a fine coffee*

## Flavor

*what distinguishes the sensory experience of coffee once its acidity, body, and aroma have been described*

## Aftertaste

*largely the product of all the other sensory elements you find in each sip. When you swallow, all these elements mingle to form the aftertaste*

## Body

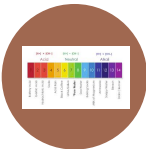

*the sensation of heaviness, richness, or thickness and associated texture when one tastes coffee*

# Ratings across coffee roast types

# Review Score Concentration

*Highly rated coffees have a review rating  $\geq 94$*

*Some of our household brands on the review spectrum*

# Next Steps

- ❑ What makes up acidity? Analysis of its components and identification of biggest drivers.
- ❑ Investigate how coffee contributes to flavor. Interesting to see how perception data can be collected and analyzed...
- ❑ Incorporate location data to investigate bean characteristics that are determined by environmental conditions

What's your cup  
of tea?
